

Hello James,

I demoed the Torus BX 5 from Creative Audio today. I was impressed by the unit - especially the way it handles the complex bass passages. It helps increase the speed of my amp but it also makes the music more relaxed sounding. My current conditioner is highly rated at filtering RF, EM, and digital hash but the Torus improved in that area as well.

Thanks for answering my questions and convincing me to give the unit a tryout.

**Best regards,
James Saul**
